

CHURCH COMMUNITY COMPLEX MASTERPLAN ACF Church, Rowville

Australia for Christ Fellowship was established in 1989 and has grown to include English-speaking, Indonesian and Mandarin congregations. The original courtyard of buildings is now too small and expansion is proposed to provide:

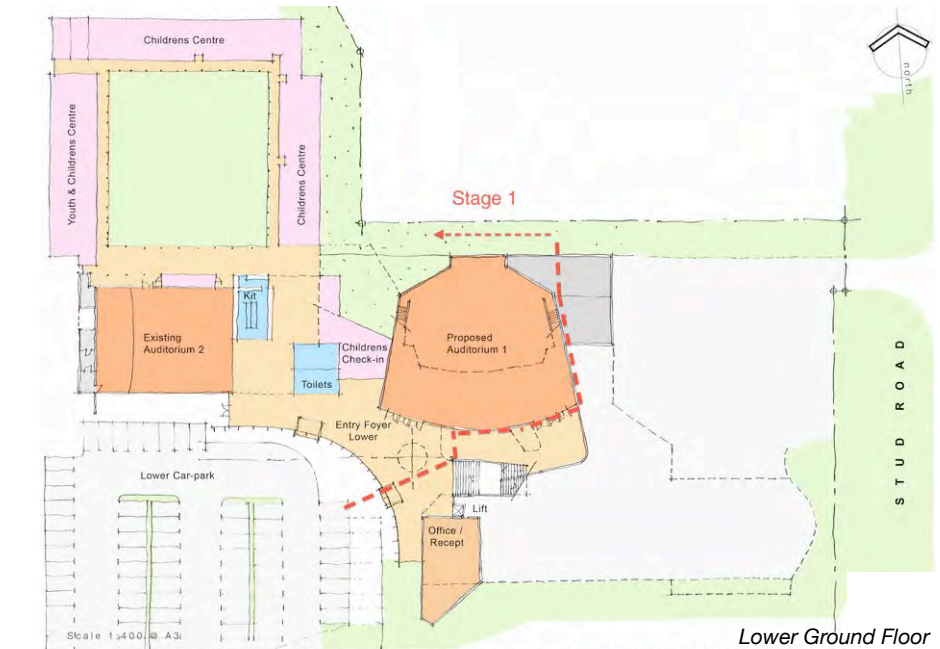

- New worship auditorium for 1000 in addition to the existing 300 seat room
- New central access foyer linking the two floor levels from the existing through to the street
- New multipurpose cafe with commercial kitchen located on Stud Road with its own car park
- Secure children centre with enclosed courtyard
- Meeting rooms, offices, parents room, AV room, library, guest lounge

Design challenges include:

- Relocating the site access to enable the existing complex to be extended across the present roadway to achieve a visible street presence.
- Using the existing 4.6 m change of level between stud Road and the existing buildings to access balcony and main levels of the auditorium
- Creating an obvious public welcome and offer of hospitality together with a unified central gathering space for casual meeting with corners for prayer
