

Architects' Services for Education

Challenges Resolved

- Working to budget - New-build within 3% of tender (no contingency) at [FCCC Senior School](#).
- Design to assist concentration - Spaces with hearing support to ensure all receive teaching.
- Variety of Teaching Spaces - To suit groups of different sizes including use of operable walls to separate or join teaching spaces.
- Indoor / Outdoor Learning - Connected and sheltered spaces as at [FCCC Senior School](#).
- Maintenance & Cleaning Reduced - Design to minimise corridors and make all floor area useful. Easy clean surfaces.
- Sustainable Environments - The building can be a teaching aid as an example of sustainability.
- Encouraging Respect - A hardwearing but quality environment will encourage respect.

Masterplanning & Feasibility Studies

Proposals to ensure that any building project will become a valuable part of likely further development. This avoids abortive work and ensures work done now remains valuable. This can be hosted online to remain up to date and accessible.

Normal Architect Service Projects
